

emna Bahia

ABOUT ME

I am a third-year engineering student in Software Architecture at ESPRIT. Passionate about software development and information systems, I am training in the best practices of design, modeling, and management of IT projects. Curious, rigorous, and motivated, I am looking for opportunities to apply my skills in real and collaborative projects.

SKILLS

- Programming Languages: Java, C++, C#, JavaScript, TypeScript, Python
- Frameworks & Technologies: Spring Boot, Angular, ASP.NET Core, Symfony, Qt, SDL, Flutter
- Web Development: HTML, CSS, JavaScript, Angular, React
- Databases: MySQL
- DevOps & Containerization: Docker, Docker Compose, Kubernetes, Jenkins, SonarQube, Nexus, Grafana & Prometheus
- Methodologies: Agile/Scrum, Software Design
- Tools: Visual Studio, IntelliJ, GitHub, Postman, Power BI
- Project Management: Jira
- Artificial Intelligence: Machine Learning, NLP

LANGUAGES

- French: B2 Level
- English: B2 Level
- Arabic: Native/Fluent

EDUCATION

ESPRIT - Private Higher School of Engineering and Technology
Engineering Degree in Software Architecture

- 2023-2025 (In progress)
- Specialization in software design, full-stack development, distributed architectures, and artificial intelligence.

ESPRIT - Integrated Preparatory Cycle
Scientific and Technical Preparatory Program

- 2021-2023
- Intensive training in mathematics, algorithms, data structures, and computer science fundamentals.

PROFESSIONAL EXPERIENCE

INTERNSHIP - DEVOPS AND AI DEVELOPMENT | 2024-2025 IMSC - Tunisia

- Development of a candidate management application integrating DevOps pipelines and Artificial Intelligence modules.
- Setup and automation of CI/CD pipelines with Docker, GitHub Actions / Jenkins.
- Implementation of intelligent features for automatic candidate matching.
- Design and integration of an NLP (Natural Language Processing) module to analyze CVs and extract key information.
- Development and training of Machine Learning models for recommendation and automatic interview question generation.
- Technologies: DevOps, Docker, Spring Boot, React, AI, NLP, ML

INTERNSHIP - DEVOPS DEVELOPMENT | 2023 - 2024 Capgemini - Tunisia

- Participation in the "Events Project" with the implementation of DevOps practices.
- Automation of deployments and management of continuous integration (CI/CD).
- Optimization of development and deployment processes.
- Technologies: DevOps, Docker, CI/CD, automation tools

ACADEMIC PROJECTS

Mobile Application with Flutter and Spring Boot | 2025-2026

- Development of a cross-platform mobile application.
- Backend architecture design with Spring Boot.
- Technologies: Flutter, Spring Boot, Dart, Java

Intelligent Internship Management Platform | 2024-2025

- Development of an intelligent student internship management application using Spring Boot, Angular, and Machine Learning.
- Implementation of a microservices architecture for internship management with ASP.NET Core, Angular, and Docker.
- Technologies: Spring Boot, Angular, Machine Learning, ASP.NET Core, Docker, Power BI, Microservices Architecture

Internship Management Platform | 2023-2024

- Design and development of a complete internship management platform connecting students, companies, and academic institutions (Java, Symfony).

Car Sales Application | 2022-2023

- Desktop sales management application with a graphical interface.
- Web version with complete sales cycle management.
- Technologies: Qt, C++, HTML, CSS, JavaScript

2D Game | 2021-2022

- Creation of a 2D game using the SDL graphical library as part of a first-year academic project.
- Development of game mechanics and graphical interface.
- Technologies: SDL, C++
